

2⁰ ANNUAL EVENT SPAINSIF

Don't miss the second annual event of Spainsif, meeting point of SRI community in Spain. The programme will include national and international participation, especially from the European network.

Find out the progresses derived from the studies about the SRI in the Corporate Pension Fund, in the European and Spanish markets. There will be also presented a research work on the practice of implication models, "engagement", as a performance of the SRI.

Be aware of the relevance of SRI in the Spanish political agenda and the role of the institutional investor in the Spanish capital market.

Get involved in the workshops about the integration of ESG criteria in the management of the assets, and the UNPRI "Clearinghouse" activity.

We expect and welcome the assistance and participation of all institutions and individuals interested in the development of the SRI in Spain.
